

## WiCIDWaMin Chemistry

(What can I do with a Major in Chemistry?)

(Note that some of these require an advanced degree)

### Industry

- pharmaceutical research / development
- improving and creating new household products
- flavor, fragrance, and food chemistry
- cosmetics chemistry
- polymers / plastics / environmentally friendly polymer replacements
- quality control
- marketing / sales

### High Tech

- operating and maintaining lab instruments
- developing new instrument technologies
- development of molecular modeling software
- training other technicians
- marketing / sales

### Governmental Work

- environmental monitoring
- FDA / public health
- policy advising
- law enforcement / forensics

### Health Sciences

- medical / dental / veterinary / other professional degrees
- medical / pharmaceutical research

### Education

- secondary education
- college-level education (requires advanced degree)
- Peace Corps / Teach for America

### Etc

- patent law
- journalism
- technical writing and editing
